

# POSTOMATIC

## BRIDGING THE GAP BETWEEN FUNDRAISING & ACCOUNTING SYSTEMS

PostOmatic is a solution designed to bridge the gap between Raiser's Edge™ and external financial accounting systems by allowing for accurate information to be exported in a format that is targeted for an external accounting system (such as Microsoft Dynamics GP, QuickBooks, PeopleSoft, Kualu, Serenic, etc.). By defining custom parameters with the PostOmatic solution, the exported data is easily integrated with external accounting software systems, resulting in more accurate financial reporting and eliminating the room for error.

### AUTOMATED TRANSACTIONS

Post transactions from the Raiser's Edge to any accounting system, any day or time

### EXTERNAL COMPATIBILITY

Communicate gift reporting to systems with exports in specified formats

### DEFINED PARAMETERS

Sort, filter, group, include, exclude, and output transactions in any format

### SPECIFIED DATA CAPTURE

Account for funds and work with all fields captured within Raiser's Edge
